CORE SKILLS

React

Angular

TypeScript

Tailwind CSS

JavaScript (ES6+)

HTML5

CSS3

Git / GitHub

MongoDB

REST APIs

Responsive Design

Java

C / C++

T-SQL

EDUCATION

Software Engineering Program
NIIT — National Institute of Information Technology
Currently Enrolled

B.Sc. Information Technology
Babcock University
Oct 2023 – Oct 2024

Foundations Course
The Odin Project
Completed

TOOLS & WORKFLOW

VS Code

Vercel

GitHub Pages

Figma

npm / CLI

Angular CLI

Front-end developer based in Lagos, Nigeria, specialising in building **responsive, production-ready web interfaces** with React, Angular, and TypeScript. I build real things — from a full-stack African vendor platform (FastAPI + Supabase + Paystack) to e-commerce frontends — and I ship them. Currently seeking a **remote front-end or full-stack role** where I can contribute immediately and grow fast.

Projects

STALLR — Africa's Vendor OS & Digital Mall

FULL-STACK

LIVE

FRONTEND

React

Vite

TypeScript

Tailwind CSS

Zustand

Wouter

Chart.js

Framer Motion

BACKEND

FastAPI (Python)

Supabase

PostgreSQL

JWT Auth

Paystack

Uvicorn

- Designed and built a full-stack SaaS platform helping African small businesses track sales, manage inventory, and sell online.
- Engineered the full frontend — responsive dashboard, animated UI with Framer Motion, real-time charts via Chart.js, and client-side routing with Wouter.
- Built a REST API backend with FastAPI, Supabase for auth and PostgreSQL storage, and integrated Paystack for payment processing.
- Deployed end-to-end on Vercel; handles real user sessions with JWT-based authentication.

LuxeWigs — E-Commerce Landing Page

LIVE

STACK

HTML5

CSS3

JavaScript

- Built a fully responsive, visually polished e-commerce landing page for a wig brand with strong attention to UI/UX detail.
- Implemented product showcase sections, smooth scroll interactions, and a clean mobile-first layout.

mini-commerce — Angular E-Commerce Frontend

LIVE

STACK

Angular

TypeScript

Tailwind CSS

- Built as a technical assessment — demonstrates Angular routing, services, reactive state management, and form handling.
- Fully responsive storefront with product listing, cart, and checkout UI built to production standards.

Web Calculator

LIVE

STACK

HTML5

CSS3

JavaScript

Clean, functional calculator with chaining operations, decimal support, and backspace — focused on solid UI logic and good UX fundamentals.

Experience

My experience is **project-based**. All projects above are live, publicly deployed, and reflect real-world frontend development skills. I am actively seeking my first formal remote role and am available to start immediately. **Open to internships, junior roles, and contract work.**
